

Gautam Makwana

Python Backend & AI Developer

About Me

- Python Backend Developer with of experience building scalable web applications, REST APIs, and AI-powered solutions using Django, FastAPI, Flask, and LangChain. Experienced in developing RAG-based systems, integrating LLMs, optimizing database performance, and deploying production-ready applications. Passionate about problem-solving, backend architecture, and emerging AI technologies.

Sanand, Ahmedabad

EDUCATION

KSV University, Gandhinagar

Master Of Computer Application
2020-2021

KSV University, Gandhinagar, Kadi

Bachelor of Computer Application
2017-2019

SKILLS

Programming Language

- Python
- Html

Libraries

- Numpy
- Pandas
- Bs4

Frameworks

- Django
- DRF
- Fastapi
- Flask

Database

- Mysql
- Postgres
- SQLite

AI & LLM

- LangChain
- RAG
- Gemini API
- FAISS
- Redis

Tools

- Git
- GitHub
- Postman
- Trello

Language

- Hindi
- English
- Gujrati

WORK EXPERIENCE

Python Developer

Yudiz Private.Ltd

Joining- 2023-Jan TO Dec-2024

- Gained hands-on experience by contributing to diverse web development and automation projects, enhancing problem-solving and coding efficiency.

CereBulb

- Joining 2025-Jan to Dec 2025
- Improved proficiency in Python through practical use of frameworks such as Django, Flask, FastAPI, and relevant libraries.

PROJECTS

Powerhouse Management:

Description: Developed a system to manage power supply operations and automate manual processes, enhancing efficiency and accuracy in monitoring and control.

Tech Stack:

- Backend: Python, Django, Django REST Framework, Pandas, Selenium
- Frontend: vue
- Database: PostgreSQL
- Tools: GitHub, Postman

Enterprise Knowledge Assistant(AI) - Conversational RAG Platform

- Developed FastAPI APIs for chatbot and document management.
 - Implemented a RAG pipeline using LangChain, Gemini embeddings, and FAISS for semantic search.
 - Used Redis for conversation memory and context retention.
 - Tech Stack: Python, FastAPI, LangChain, Gemini API, FAISS, Redis
- Tech Stack: Python, FastAPI, LangChain, Gemini API, FAISS, Redis

Work Point:

- Designed and implemented scalable RESTful APIs using Django REST Framework.
- Performed testing, debugging, and code optimization to improve application stability and performance.
- Technologies used : Backend: Python, Django, Django REST Framework

Web Scraping:

- Scraped and processed 3,000+ records in under 10 seconds using multithreading.
- Improved scraping performance by 70% compared to sequential execution.Tech Stack:
- Languages & Libraries: Python, BeautifulSoup (Bs4), Threading, CSV
